TRABAJO FIN DE GRADO

PROBLEMAS

ISOPERIMÉTRICOS

Presentado por:
D. Álvaro Juguera Carrillo

Tutor:
Prof. Juan Carlos Cabello Piñar

Curso académico 2023/2024

This final degree project (bibliographic) consist of the study and explanation of the easiest solution for isoperimetric problems.

To solve these problems, first, the problem will be stated and then, the problem will be modeled mathematically. After that, the mathematical solution will be explained and finally, the solution will be interpreted with practical examples. So that anyone who reads this final degree project can understand what the problem consists of, its resolution and how useful it is nowdays.
