RECOMMENDED LEARNING RESOURCES/TOOLS

AEHE: in recent times, the AEHE has been supporting different initiatives. Some are aimed at reflecting and exchanging points of view on issues related to teaching and innovation and the quality of teaching education. In this sense, the Didactics of Economic History Meetings have been held since 1990. As of the XI Meeting (Toledo, 2012) its periodicity is biannual and in it the Santiago Zapata Award is given to those people who have excelled in the dissemination and teaching of Economic History. Other initiatives seek to encourage exchanges of scientific activities with economic history associations. In this sense, it supports the meetings that the

Italian-Spanish Committee for Economic History holds on a regular basis, whose first meeting dates back to 1989, in the city of Turin. The last one took place in Genoa (October 2007) and the next one will take place in Menorca (2009). And it also supports the meetings held by the Franco-Spanish Committee (Madrid, July 2006, Aix-en-Provence, June 2008). The AEHE recognizes the trajectory of its most distinguished members, the notoriety of the teaching work and the research excellence of its partners with different awards. The Ramón Carande Prize, aimed at young researchers in economic history, has been awarded annually since 1987, publishing their work in the *Revista de Historia Económica - Journal of Iberian and Latin American Economic History*, first, and in *Investigaciones de Historia Económica*, since 2005.

[Inicio AEHE - aehe](#)

TEACHING METHODS

- MD01 Docencia presencial en el aula
- MD02 Estudio individualizado del alumno, búsqueda, consulta y tratamiento de información, resolución de problemas y casos prácticos, y realización de trabajos y exposiciones.
- MD03 Tutorías individuales y/o colectivas y evaluación

ASSESSMENT METHODS (Instruments, criteria and percentages)

ORDINARY EXAMINATION DIET

In order to evaluate the acquisition of the contents and competences to be developed in the subject, a diversified evaluation system will be used, selecting the most appropriate evaluation techniques for the subject at each moment, which allows to highlight the different knowledge and skills acquired by the students when taking the course.

Among the following evaluation techniques will be used some of them:

- Written test: essay exams, objective tests, problem solving, cases or assumptions, short answer tests,
- Oral test: oral presentations in class, individual, on contents of the subject (seminar) and on the execution of practical tasks corresponding to specific competences.
- Observation behaviors that the student performs in the execution of tasks or activities that correspond to the skills.
- Techniques based on attendance and active student participation in class, seminars and tutorials: work in small groups on proposed practical cases.

Students who cannot follow this continuous assessment, which requires the specified commitments, will have the opportunity to take a final exam.

The rating system will be expressed by numerical rating in accordance with the provisions of art. 5 of R. D 1125/2003, of September 5, which establishes the European system of credits and the system of qualifications in university degrees.

The final grade of the student will be obtained by adding the weighted score of the different

aspects and activities that make up the evaluation system.

These may vary depending on the specific needs of the subjects that make up each subject and depending on the orientation defined by the knowledge areas responsible for imparting them.

The evaluation system will be specified in the teaching sheets of the subjects that will be published in the websites of the degree and the Faculty for each course and will respond to the coordination between the teachers involved, the Departments and the Faculty.

The following weightings are indicated as a guide:

- Exam - 40%
- Class practices - 60%.

Specifically, the teaching methodology to be followed in the subject will consist, approximately: continuous evaluation consists of test-type controls throughout the semester, the practices and participation in class.

EXTRAORDINARY EXAMINATION DIET

- Exam
- The grade for the extraordinary evaluation will be the maximum between the grade for the extraordinary exam and the grade obtained as a weighted average of the grade for the extraordinary exam (40%) and the grade for the practical exercises carried out throughout the course (60%).

SINGLE FINAL ASSESSMENT (evaluación única final)

Final exam
